Valor **Multi-MID**

Take control of payment management with Valor PayTech's Multi-MID feature. Assign up to 10 unique EPIs to different operators, ensuring seamless transaction processing without needing multiple devices.

Why do merchants prefer Multi-MID?

Unique operator access

Each operator gets their own dedicated EPI, ensuring that each transaction is linked to the individual that's processing it.

Effortless POS integration

Users simply enter their EPI on the POS before processing any, ensuring that the transactions are handled quickly and efficiently.
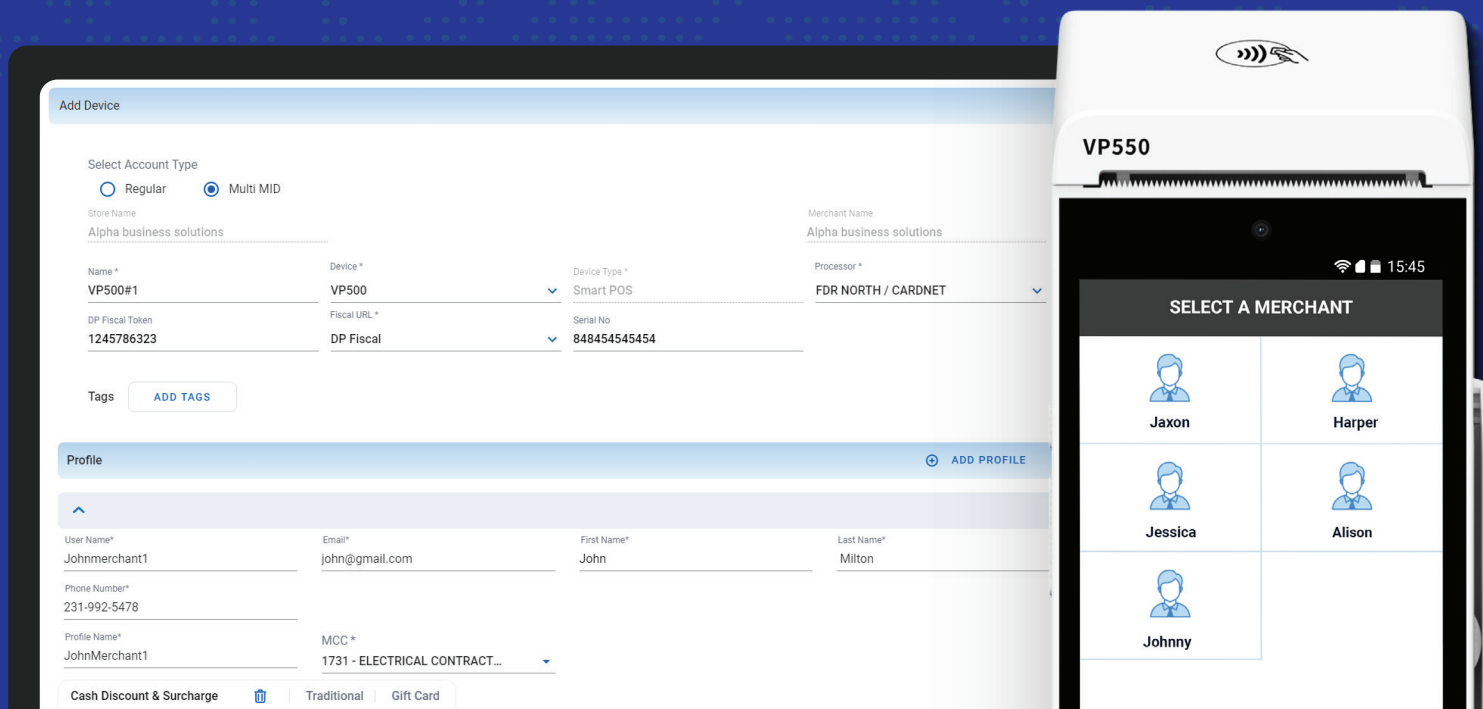

Clear & transparent reporting

With the ability to generate reports for each MID individually, Multi-MID ensures you can track every transaction with precision.
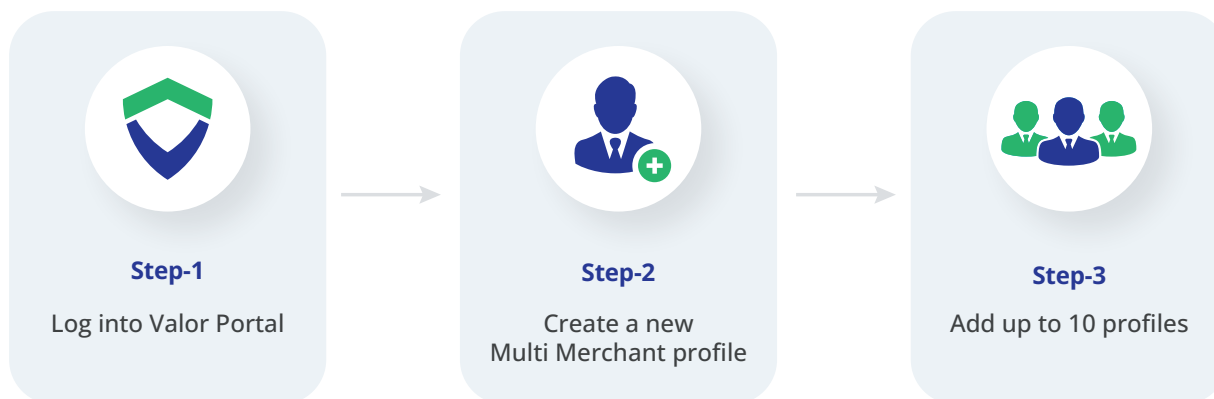

Smarter business management

Streamline your operations with multiple EPIs on a single device, saving costs and improving efficiency.

One device, multiple payment IDs
